- Publish reports to the web

"Pivotier is one of the easiest report-building tools I have ever used!"

*"This reporting should have been in the base product long ago.
Could you sell this to Microsoft?"*

*"My customers are tired of having to go to and learn an external application
like Excel to produce reports"*

Pivotier provides a complete suite of reporting tools and productivity aids which are designed to leverage the latest Microsoft technologies and tools. Tools which your Dynamics NAV customers already own when they license Microsoft SQL Server!

Tools such as:

- **SQL Server Reporting Services (SSRS)** – enables web report distribution and scheduling PLUS integration to Microsoft Sharepoint,
- **Report Definition Language (RDL) 2008 & 2010** to deliver rich data visualization,
- **Report Viewer 2010** –all reports run against live NAV data,
- **SQL Server Business Intelligence Development Studio (SSBIDS)** –a free copy of Visual Studio to use for report development against Microsoft Dynamics NAV.

Pivotier leverages the native power of Microsoft SQL Server and its powerful **TRANSACT SQL** scripting language, together with the latest **RDL** specifications to connect these new tools and technologies to your NAV data. Pivotier resolves the troublesome NAV data issues such as:

- **Flowfields, Option Fields and Boolean Fields** are translated into TRANSACT SQL.
- **Language Captions** are interpreted to generate multi-lingual reports.
- **Direct SQL calls** for reports which are FASTER than base NAV and crush EXCEL reports.

Pivotier - The **RIGHT** Report Writer for

The Pivotier Product Line – Something for Every NAV User.

Pivotier BIZ - for Non-Technical End Users

Provides three powerful reporting tools for creating Ad-hoc Reports, Financial Reports and for Analysis reports. Each of these tools is designed to be used without any programming knowledge or a forced dependence on so-called “experts”. New reports are created in minutes and incorporate rich visualization tools such as charts, gauges and indicators.

Pivotier IT - for Experienced NAV Developers

Leverages Microsoft’s most powerful and modern report development tool – Visual Studio – to allow NAV developers and ISVs to create dynamic, informative and colorful custom reports. Makes the C/SIDE Report Designer redundant. Pivotier IT offers the only 100% RTC report development tool for Microsoft Dynamics NAV.

Pivotier WEB - for Employees with Internet Connections

Allows all BIZ, RT and IT reports to be published directly to SQL Server Reporting Services (SSRS) for cost-effective report distribution across the enterprise. SSRS also enables automated report scheduling and distribution and publishing reports to Microsoft Sharepoint.

Pivotier RT - for Customers with Remote Sites or for ISV Customers

Allows customers to run any Pivotier report which was developed by their partner, ISV or corporate IT department.

Pivotier Express Plus - for ALL NAV Users, Everywhere

Provides over 70 new and updated base system reports to replace and enhance the older C/SIDE reports so that all Classic as well as RTC users can enjoy the benefits of their investment in Microsoft technologies and Microsoft SQL Server.

Pivotier 2 Go for disconnected Mobile Users

Use the world’s leading tablet with an 80% market share to take your NAV reports on the road. Pivotier 2 Go connects Pivotier reports to the Apple iPad and allows you to refresh report content via NAV 2009 web services..

Pivotier reports are: **Fast, Modern, Colorful, Secure, Pervasive, Real-time** and **Easy** to use.

1. We support both Classic and RTC users so that all your customers enjoy new reports
2. We support database version 4 onwards to allow your customers time to upgrade
3. We publish reports to Viewer, Excel, Word, Email, PDF and SSRS

Pivotier is the **RIGHT** Report Writer for Microsoft Dynamics NAV.
