

Oil and Gas Field Services Microsoft Dynamics NAV

Oil and gas field service companies face unique challenges to prevent the demands on the back office and accounting operations from requiring more labor and consuming a higher than optimal share of profits from field servicing operations. With Computer Business Solutions' enhancements to Dynamics NAV *made specifically for oil and gas field service providers* these challenges are met with one software, one database, designed to:

- Speed back office billing & accounting operations,
- Easily meet reporting requirements of operators,
- Improve accuracy & customer service,
- Provide real-time visibility to performance & profitability, and
- Enable you to improve the bottom line, collections, and cash flow.

Oil and Gas Field Services challenges solved:

Labor intensive Equipment and Personnel Deployment, Ticketing, and Billing:

- Efficiently utilize and bill for equipment and personnel deployed in the field.
- Reduce delays in the approval process with increased billing accuracy from operator specific contact pricing.
- Flexibility to comply with operator specific billing requirements with detail, frequency, and Site/Well/Rig/AFE information requested.
- Invoices for specific service can automatically assign dependent equipment and crews.
- Invoicing for equipment by date range can optionally calculate crew times by hours and feed payroll.
- Quickly see utilization of each equipment, rig, or crew, individually and by user-defined categories.
- Track profitability by equipment, vehicle, crew, operator, well, job etc.
- Service or field tickets may be entered after the fact, or in advance as a request for service.
- Tickets may be converted to invoices at the touch of a button.
- Field ticket information can be captured in the field and automatically update accounting.

Equipment, Rental & Scheduling:

- Reserve equipment by day, week, month, date range, or hour.
- Immediately see availability by specific category, and by individual rental asset.
- Offer flexible rental terms dayrate, weekly, monthly, hourly, or other intervals.
- Customer specific contract pricing ensures billing accuracy.
- Instantly know availability of equipment assets, consumables, and crew while entering a quote or sales order.
- Know location of all assets at any point in time.
- Optionally integrated with Fixed Assets module. Sales of rental equipment can automatically dispose the rental asset.

Equipment Maintenance and Insurance & Safety Compliance (separate module):

- Manage equipment maintenance and repair records
- Schedule preventative maintenance by date or usage
- Assure adequate insurance is in place for equipment, workers comp, and 1099 contractors
- Maintain OSHA and DOT safety records
